Accessories ID Cards Self Service Kiosks Clock Terminals

HID Proximity Cards

ISOPROX II

The 125KHz programmable IsoProx II offers proximity technology and photo ID on a single access control card. Compatible with all HID proximity readers, it features a consistent read range. IsoProx II provides an external number for ease and control.

DUOPROX II

The DuoProx II 125KHz RF card provides a single card incorporating proximity, magnetic stripe and photo technologies for multiple applications. Compatible with all HID proximity readers, it provides an external number for ease and control.

Magnetic Stripe Cards

A simple and secure way to enhance the functionality of your ID card program is to incorporate magnetic stripe cards. These cards are able to store information on a magnetic stripe which is read when the card is swiped through a special reader for applications such as cashless payment, access control, time and attendance and equipment checkout.

Plain ID Cards

ID cards made of durable PVC plastic.

Prox Tag

The Prox Tag is a small disk-shaped transponder. Simply attach the adhesive backed tag to any non-metallic card or device and you instantly have a proximity card.

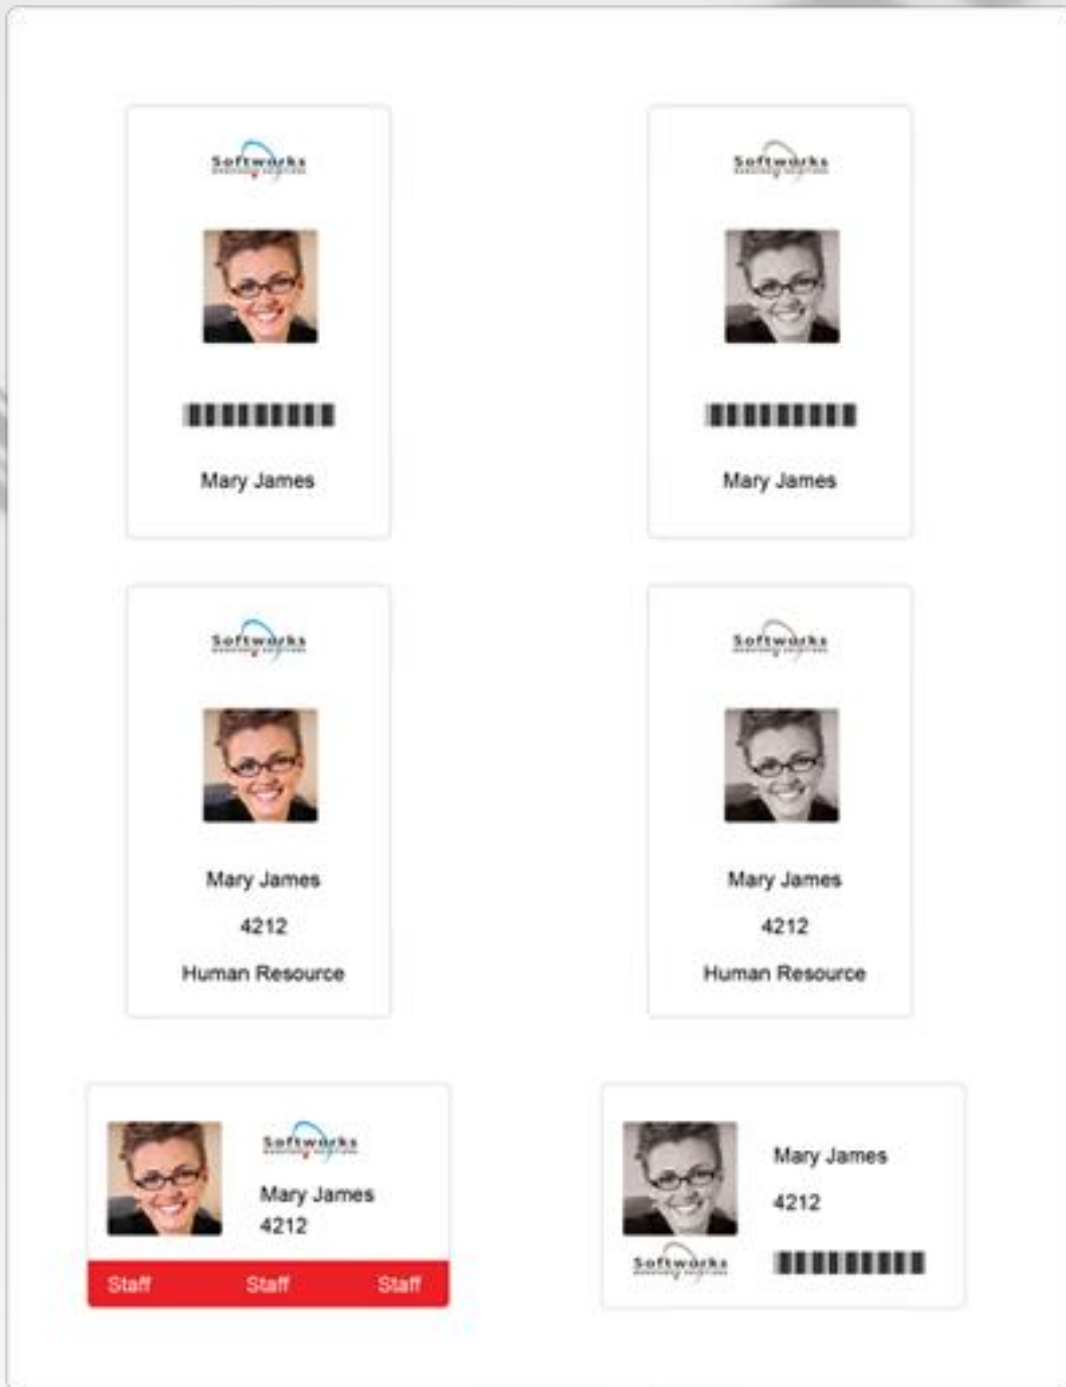

Prox Key II

The RF-programmable Prox Key II proximity key fob incorporates proximity technology into a convenient device approximately the size of an automotive key. Compatible with all HID proximity readers, it provides an external number for ease and control.

Time & Attendance Terminals

Biometric Time Attendance & Access Control terminal

With a clear 3.5" colour screen you can proudly display your employees' photos, company welcome banner, or any other images which will further enhance your company's image.

An innovative and elegant looking terminal, there are multiple options available, which can be used for both Access Control and Time Attendance applications.

Options include:

- Standard proximity cards
- HID cards
- Mifare cards
- Biometric fingerprint matching

This Terminal can also be used in multi factor authentication that supports fingerprint, password, Proximity and Smart card. It also has an option for Wi-Fi and GPRS connectivity.

Time Attendance & Access Control

Entry Level Biometric Time Attendance & Access Control terminal

One touch. That's all it takes to register time & attendance on this entry level biometric reader. Fast, reliable performance combined with affordability gives this standalone reader the competitive edge.

Our biometric readers use the fastest fingerprint-matching algorithm in the industry, offering unparalleled precision and speed. Enrolling users is fast and easy, with a user-friendly keypad and display.

Hand Punch Time Attendance Terminal

The Hand Punch allows supervisors to override user restrictions and to input such items as missed punches, planned vacations, and sick time at the terminal. The password-protected mode provides greater supervisor flexibility by lessening the need for computer edits. Audit trails documenting the use of these functions are generated to ensure security. Softworks provide a full range of hand punch terminals.

Soft works carry the full range of hand punch terminals.

Time Attendance & Access Control

Cost-Effective

A cost-effective solution for data collection applications. A wide choice of options are available, including mifare® Smart Card Readers. Different models are available for specific applications

Flexible and functional

This terminal offers users and system integrators a flexible and functional platform for a host of data entry and collection applications. Packaged in a robust enclosure and available with a variety of card and biometric readers, the terminal provides an ideal platform for retail and industrial time and attendance and data collection applications.
